

# iTunes Album Cover Quick Tutorial

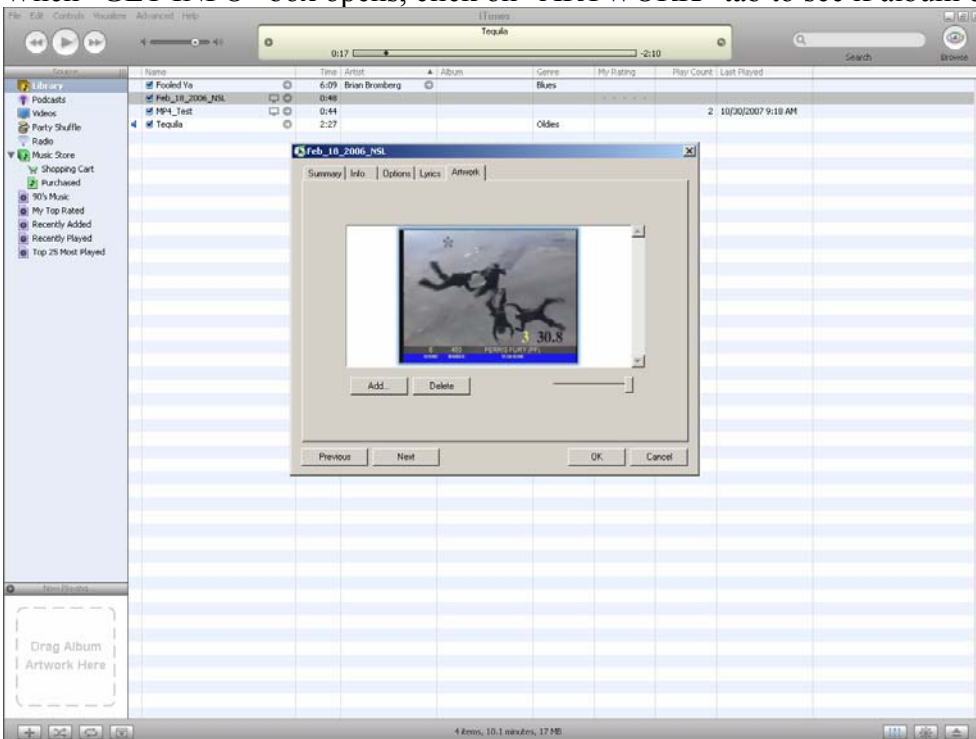

## Step 1

Open iTunes and highlight the iTunes song you want and Right-Click to raise this dialog box. Then click “GET INFO”

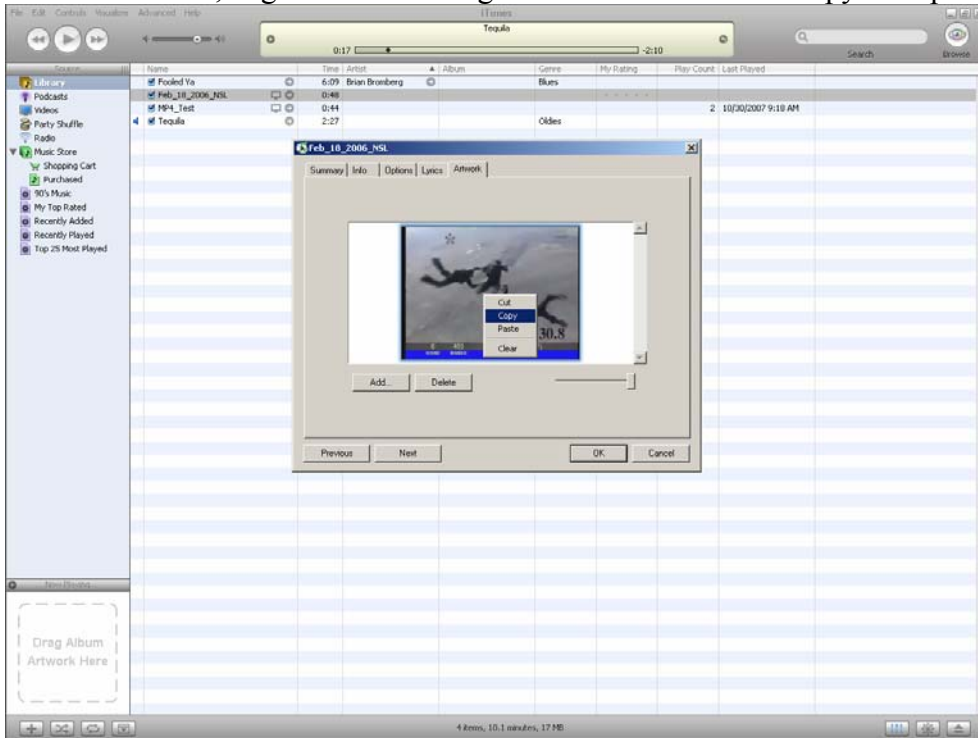

## Step 2

When “GET INFO” box opens, click on “ARTWORK” tab to see if album cover artwork actually exists in the file.

### Step 3

If artwork exists, Right-Click on image and click “COPY” to copy to clipboard.

### Step 4

Open a photo editing program and “PASTE” clipboard image into new file. Once pasted, you can save the “Album Image” file and use in your movie.

Note: Be careful of certain proprietary program file types when you save. JPG file type seems to work well.

And that’s all there is to it. Have fun.
